Select #: WP0145408  
Representative WILLIAM PASS

Many pilots and their passengers are not fully aware of some challenges an ocean can bear. Ditching an aircraft is a rare occasion, but like all six numbers in Mega Millions, it can happen to you!

With simple steps and smart flight planning you can prepare your aircraft, your crew and passengers: Smart flight planning  
Emergency Equipment and its use ELT, PLB, EPIRPS Emergency Decision Making  
Ditching Techniques Psychological and medical factors for surviving  
In a couple of group exercises (a.k.a. crash-teams) you'll learn using limited resources, time and techniques to successfully overcome stress situations without getting your feed wet.

### **A message from the National FAASafety Team Manager**

Over 10,150 AMTs earned an AMT Award last year. Will you, this year?
